Who we are and what we offer

As an international organization for standardization, we’ve been devoted to developing cross-sectoral industry data reference standards for 20 years. By providing a consistent and uniform basis for B2B data exchange, the **ECLASS** Standard helps companies adapt to digitalization. With its dictionary, **ECLASS** provides the semantics for machine-to-machine communication and thus enables Industry 4.0 applications in the Internet of Things.

ECLASS — Standard for Master Data Management

- ISO/IEC-compliant
- Semantics for IoT
- 17 languages
- More than 48,000 commodity classes
- More than 20,000 properties
- Open standard / Regular updates
- About 4,000 users
- Global network of Service Providers
